

307 RANCH™ NATURAL FEED & NUTRITION

LASSAHOL™

CLEAN | HEALTHY | NUTRITION

HIGH-ENERGY LIVESTOCK SUPPLEMENT

WHAT IS LASSAHOL™?

307 Ranch™ Lassahol™ is a natural high-energy feed supplement derived from fermented molasses. By introducing Lassahol™ into your daily feed consumption, hydrogen is added to the rumen which improves overall digestion. With better digestion, cattle ingest more nutrients from foliage and reduce the possibility over-grazing.

POWERFUL VITAMIN COMPLEX

Lassahol™ also contains a variety of vitamins needed for daily supplementation. It includes Vitamin A, Vitamin D, Vitamin E and Vitamin B₁ which further improves the health of the herds young and old.

WEANING CALVES WITHOUT THE STRESS

Lassahol™ has also proven effective in providing nutrients that help transition healthy calves through the weaning process without crying. Calves quickly transition from the mother to grazing with less complaint and start the weight-gain process sooner with satisfying results.

FEEDING INSTRUCTIONS

Adult Cattle: 1oz added to feed per 1200lbs.

Calves: 1oz added to feed per weaning weight.

FROM OUR HERD TO YOURS

At 307 Ranch™, we are dedicated to healthy, clean beef. We work tirelessly to research and develop quality feeds and supplements to ensure our cattle are healthy, productive and cost-effective. All of the products we offer are used on our own herds, so you can be sure they have been tried and tested to prove they are as good as we say they are.

307 Ranch™ is passionate about providing healthy, clean beef products to our customers that contain no pharmaceuticals or synthetics. This obsession is rewarded by satisfied clients who return to our products over and over again.
